Environmental services – service delivery plan 2022/2023

Overview of the service

The activities of environmental services are based on a number of environmental health "core functions". The provision of the service impacts on public and environmental wellbeing, by the prevention, detection and control of environmental hazards and public behaviours.

The service is delivered by three operational teams. The key functions and responsibilities are:

1. Commercial team

- Food safety food safety is a statutory function and there are approximately 880 food premises registered within the district. Inspections of food premises are carried out in line with nationally set risk based frequencies ranging from a minimum of 6 months to 3 yearly intervals.
- Issuing food hygiene ratings to businesses in the national scheme.
- Issuing of registration to skin piercers and establishments.
- Health and safety- health and safety inspection and enforcement of workplaces is a statutory function and includes the investigation of workplace accidents and fatalities.
- Communicable disease control investigation of infectious disease, food poisoning outbreaks.

2. East Cambridgeshire care and repair team

- Housing grants care and repair support the elderly, disabled and vulnerable to access mandatory disabled facilities grants and discretionary grants by organising and overseeing the building works to current building regulations and planning laws and submitting paperwork on the client's behalf through to completion of works.
- Sign posting the service supports clients to access other forms of help by liaising with charities and sign posting to other support groups or local contractors.
- Benefits check the service provides a benefit check to all clients who are subject to a financial means test to ensure they are receiving the correct income and refers them onto the appropriate organisation where necessary.
- Partnership working agreement with Sanctuary Housing is facilitated through care and repair for them to cover 40% of the cost towards adaptations to their stock. This

provides in excess of £100,000 additional funding from the sanctuary group for housing association tenants to access the mandatory disabled facilities grant.

• Panel meeting - work in partnership with the children's and adults occupational therapy teams. Attend panel meetings for assessing applications for the mandatory disabled facilities grant.

3. Domestic team

- Private sector housing conditions
 – officers undertake a range of public health and housing functions, including investigating house condition complaints, hmo inspections, inspection of unsanitary or hoarded properties, empty property complaints, mobile home site inspections, and mandatory hmo and mobile home licensing. The aim is to develop strategies and procedures that address and improve housing standards and to work with owner occupiers, private landlords and social housing providers, to protect residents and visitors to the district. Formal enforcement action is taken to secure compliance with standards when required.
- Environmental protection the core function is statutory and relates to the protection
 of public health and the environment by the regulation and support of individuals and
 businesses and other services in the following areas; air quality review and strategy,
 contaminated land, drainage investigation on private systems, environmental
 pollution prevention control permits, pest control advice and enforcement, private
 water supply monitoring, statutory nuisance investigation and enforcement and stray
 dog services. The department is a statutory consultee for planning and licensing
 applications.

Environmental crime_-officers undertake statutory functions to ensure a clean and safe environment. These include the enforcement of fly tipping, littering, dog fouling and abandoned vehicle_offences, through the use of a wide range of enforcement options for example fpn's and cpn's right through to prosecutions for the more serious waste offences. In addition, enforcement officers work with residents, businesses and local groups to provide education and advice to help improve understanding of the impacts and penalties of environmental crime.

 Energy efficiency - the home energy team advises homeowners and private landlords about thermal insulation and minimum energy standards. The officers also engage with fuel providers and third parties to help resolve energy debt problems and assist residents experiencing fuel poverty access short term grants. Officers also access and administer government funding to provide energy improvement measures such as fabric insulation and clean heating & hot water systems. Half of the fte post is externally funded

All activities stem from legislative requirements, however it is recognised that partnership working with a wide range of external organisations, the provision of advice and guidance, educational and promotional activities, as well as traditional enforcement actions are all

designed to; reduce the regulatory burden for businesses, ensure fair trading, support economic recovery and prosperity and protect the public and local environment.

Environmental services is uniquely positioned to improve individual and public health & wellbeing. It helps reduce health inequalities and provides a lead and coordination on actions by the council to tackle the wider determinants of health such as; poor housing conditions, environmental quality, working conditions and economic prosperity.

Cost of service

The cost to run the service totals £694,863 this amount includes staffing costs, contract costs for the stray dog warden service.
